Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React 19, Next.js, Tailwind CSS, Framer Motion, Vite

Backend: Node.js, Express.js, FastAPI, RESTful APIs, WebSockets (ws), Prisma ORM

Databases: MongoDB, PostgreSQL, MySQL

Tools: Git, GitHub, Cloudinary, Vercel, Render, Postman, Zod

Projects

CourseSpace — Secure E-Learning SaaS Platform

Jan 2026

React, Node.js, Express, MongoDB, Zod, Cloudinary

[GitHub](#) | [Live Demo](#)

- Built a secure course platform with runtime Zod payload validation eliminating NoSQL injection vulnerabilities, plus Helmet headers and modular IP rate-limiters to harden against DDoS/brute-force.
- Mitigated digital piracy risks by sandboxing YouTube Player APIs in custom iframes; built a stateless media pipeline with Multer → Cloudinary CDN and rolling file-system logging via Winston.

Second Brain — AI-Powered Knowledge Workspace

Nov 2025

React, Node.js, MongoDB, Redis, Groq/OpenAI APIs

[GitHub](#) | [Live Demo](#)

- Built a production-ready knowledge hub automating ingestion of articles and YouTube transcripts into a MongoDB vector index for context-grounded RAG chat via Groq and OpenAI APIs.
- Designed an async queue system using Redis + BullMQ with a freemium conversion funnel enforcing custom billing blocks for free-tier users.
- Bypassed strict data-center IP blocks and 429 rate errors from streaming platforms by engineering an automated fallback orchestration pipeline using public oEmbed APIs.
- Secured multi-user data with JWT + Google OAuth 2.0, Zod schema validation, and bcrypt hashing; extended OAuth callback to eliminate duplicate account bugs via cross-layer lookups.

Slate — Real-Time Collaborative Chat Platform

Apr 2025

React 19, Node.js, WebSockets, MongoDB, Cloudinary, Vite

[GitHub](#) | [Live Demo](#)

- Developed a low-latency multi-room WebSocket server sustaining 100+ simultaneous connections with optimistic UI updates achieving sub-100ms perceived message latency.
- Implemented full message lifecycle — typing indicators, inline replies, presence tracking, edits, soft-deletes — synchronized in real time across room-scoped client maps.
- Reduced initial JavaScript payload by 30% via Vite code-splitting and lazy-route evaluation; secured WebSocket upgrades with JWT handshake validation and ownership authorization.

Education

Newton School of Technology, Rishihood University

2024 – 2028

Bachelor of Technology (Data Science)

Kendraya Vidyalaya Almora — Intermediate (Class XII), Grade: 87.0%

2022 – 2023

Holy Angel Public School — Matriculation (Class X), Grade: 90.0%

2020 – 2021

Achievements & Coding Profiles

- LeetCode: Solved challenges spanning Graphs, DP, Trees, Sliding Window, and Two Pointers; competes in weekly timed contests to sharpen algorithmic speed and pattern recognition.
- Portfolio: Built himanshupandey.me from scratch using Next.js + Framer Motion with custom HSL design tokens, dark-mode transitions, and zero external UI library dependencies.
